

Compliance CORNER

Our VALUES

In 2007, outpatient radiology is a challenging market. One way we meet this challenge, and grow stronger as an organization, is by focusing on service excellence – for our patients, our referring physicians, and everyone we come into contact with on a daily basis. Coupled with service excellence are our core organizational values. Our values define who we are today and how we will meet tomorrow’s challenges. Below are our values as printed in our Standards of Conduct.

STATEMENT OF VALUES

In all matters, the employees of ARS will strive to meet the ARS Mission of providing services of superior quality efficiently, compassionately and courteously. This Mission can only be upheld by embracing basic values that foster and encourage respect in all of our actions.

RESPECT FOR PATIENTS

ARS recognizes that our patients and their needs form the basis for our business. We strive to deliver patient care safely, timely and competently. We will respect the patient’s right to confidential, compassionate treatment as we seek to provide services to enhance their care. We will accept our responsibility to provide appropriate medical services in accordance with applicable laws, regulations and accreditation guidelines.

RESPECT FOR FELLOW EMPLOYEES

ARS employees recognize and respect the dignity, diversity and importance of each other as co-workers. By working as a team that utilizes the talents and strengths of its individuals, ARS employees become the most important assets in the Company’s endeavor to grow and meet its Mission.

RESPECT FOR REFERRING PHYSICIANS AND VENDORS

ARS will deal professionally, courteously and honestly with our outside contractors, vendors and referring physicians. We will strive to maintain mutually rewarding business partnerships which support our commitment to quality and value in our endeavor to provide practical patient care.

RESPECT FOR THE ENVIRONMENT

ARS will manage the resources and capital entrusted to us in a responsible, accountable and environmentally sound manner. We will demonstrate environmental respect by using funds prudently and by following laws and regulations which govern the environmental aspects of our operations.

This ARS company-wide commitment to the Respect of our patients, our coworkers, our business partners, and our environment will allow us to achieve our Mission the right way, and increase the long-term value of our Organization.
