	<u> </u>	

# Why should you care?

- Office of Inspector General (OIG)
- US Sentencing Guidelines (2004)
- Office for Human Research Protections (OHRP)/Food and Drug Administration (FDA)/ Office of Research Integrity (ORI)
- Centers for Medicare and Medicaid Services
- Health Insurance Portability and Accountability Act (HIPAA)
- Stark/Anti-Kickback
- Organization/Board Responsibilities

## In Guidance

- American Health Lawyers Association and OIG compliance guidance for Boards
  - $\circ~$  Does the compliance program address the significant risks of the organization?
  - How were those risks determined, and how are new compliance risks identified and incorporated into the program?
  - How is the Board kept apprised of significant regulatory and industry developments affecting the organization's risk?
  - How is the compliance program structured to address such risks?

	Page 1

# Why conduct a risk assessment?

- · Proactive versus reactive
- · Supports enterprise risk management
- · Cultural integration
- · Raises awareness of program value
- · Mitigation of penalties
- · Continuous program improvement
- · Basis for annual work plan
- · Identifies needed resources
- OIG requires for organizations under a CIA

Risks
Compliance
Compliance
Threat from vic code of conduct
Internal Aud
Same but also c risks and other

# versus Internal AuditDENTIFY

olations of laws, regulations, or standards of practice

consider financial statement operational risks

# Risk management key components

Identify or designate risks based on experience, regulations, trends, and regulatory agencies

Environmental scan is part of the identify step and will be discussed in more detail

Prioritize risks on the likelihood that an adverse event will occur and the magnitude of the impact if the event did occur

Accept, avoid, or mitigate risks (share, transfer, reduce, control, audit) based on management's risk tolerance

(<u>A</u>)

2
1

### What is a risk?

- Identify
- Exposures now and in the next 3-5 years
- Key process or functions which lack mitigation or could have impact on operations
- Complex studies, processes, or functions with multiple stakeholders, hand-offs, control, and authority
- · Key strategic initiatives, mergers, etc

(<u>A</u>)

# How to identify compliance risks

- Start with your organization's strategies and key initiatives
- · Consider regulations what has changed
- · Updated or deleted policies, and procedures
- Innovation
- · Evaluate the OIG work plan, audits, and enforcement activity
- Consult requirements of other federal and state agencies OCR, OHRP, FDA, OSHA, OSHPD

\_

# How to identify compliance risks (cont.)

- Review auditing and monitoring results, prior risk assessments, and reports
- Evaluate how data mining, predictive analytics, and cross-jurisdictional intelligence might impact you
- Survey employees, key stakeholders, vendors
- · Conduct individual interviews
- Convene focus groups and brainstorming sessions
- · Convene content groups

### Other Sources of Risks

 The OIG Work Plan is just a starting point – search for your specialty in other federal reports and keep current in your reading

http://oig.hhs.gov/newsroom/whats-new/

- Keep in touch with your specialty societies that follow regulatory changes
- Search your Contractor website and newsletters for updates and changes in your contractor policy

# Environmental scanning-What?

- Systematic process of collecting and analyzing information about an organization's internal and external environments for planning, forecasting, or choosing a preferred future
- Being integrated into leading edge risk management programs

# Environmental scanning: Objectives

- Detecting important economic, social, cultural, environmental, technological, and political trends, situations, and events
- Identifying potential opportunities and threats implied by trends, situations, and events
- Gaining an accurate understanding of the strengths and limitations of your organization
- Identifying and assessing risks as part of your risk management program

# Environmental scanning: Stakeholders

• Internal

- Involve cross-functional stakeholders and subject matter experts across the organization
- External
  - Vendors, community physicians, legal and risk management advisers, external financial auditors

(<u>M</u>)

# Environmental scanning: <u>Te</u>chniques

- · Consult your colleagues
- · Benchmark with peers
  - Survey employees, key stakeholders, vendors
  - · Conduct individual interviews
  - Convene focus groups and brainstorming sessions
  - Use delphi-type conferences and polling techniques

# Sample evolving risks

- · Ability to control genetics of humans, animals, and plants
- · Bionic people
- · Connectivity across the continuum of care
- · Convergence of 3D digital design, medical imaging, and 3D printing
- Convergence of nanotechnology, biotechnology, information technology, and cognitive science
- · Open health care information versus privacy
- · Patient choice, patient power
- · Rise in telemedicine
- · Wearable devices

0				
10			_	
	1	٠,	'n.	٦

# Assess and prioritize identified compliance risks

- Evaluate risks on the likelihood that an adverse event will occur
- · Rank risks High, Medium, Low

	ILLUS	STRATIVE LIKELIHOOD SCALE
Rating	Descriptor	Definition
3	Frequent	<ul> <li>&gt; 50% chance of occurrence</li> </ul>
2	Possible	<ul> <li>&gt; 10% up to 50% chance of occurrence</li> </ul>
1	Unlikely	• < 10% chance of occurrence

(<u>A</u>)

# Assess and prioritize identified compliance risks

· Quantify the magnitude of the impact on your organization if the event did occur

	ILLUSTRATIVE IMPACT SCALE			
Rating	Descriptor	Definition		
3	Major	Financial loss of > \$1 million     Significant prosecution, fines or litigation     Corporate integrity agreement, federal exclusion     Gamechanging loss of market share, loss of major donor support     Multiple senior leaders leading.		
2	Moderate	Financial loss > \$500 thousand to \$1 million     Prosecution, fines or litigation     Report to regulator with immediate correction to be implemented     Loss of market share and donor support     Major staff morale problems and increased turnover		
1	Minor	Financial loss of = \$500 Thousand     Fines or refunds required     Reportable incident to regulator with no follow up required     Little impact on market share or donor support     General soff morale problems and turnover		

# Incorporating the Risk Assessment

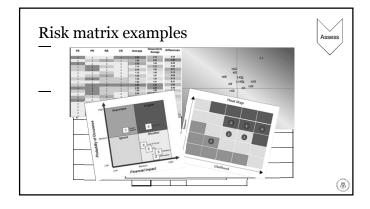

(A)

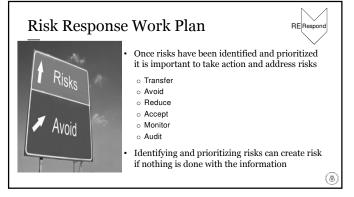

- Risks identified and prioritized
   High risk is costly to the practice with a high likelihood of occurrence (Impact and vulnerability)
- Controls
  - o Policies and procedures
  - Education and training Audits

  - Quality assessment
  - Management approvals
  - Other

# R. . . . . . . . .

# Reducing risk profile

- A risk profile is an evaluation of the threats to which an organization is exposed and the organization's willingness to take risks
- Reduce your organization's risk profile by increasing the creativity and efficacy of your organization's risk identification process
- Improve your risk identification process with an effective environmental scanning process
- Take what you learn from environmental scanning and develop scenarios of possible futures

(¥)

# Reducing risk profile

- Involve a cross section of experts in evaluating threats and opportunities that could impact your organization
- Assess the current initiatives and controls already in place to address risks
- Determine the additional actions and investments needed to adequately address risks

# Part 3 – Reducing risk profile

Case #1 - Convergence of 3D digital design, medical imaging, and 3D printing

- What compliance risks are introduced?
- What mitigation strategies should compliance be using?
- Can you suggest any best practices?

(1)		-
1 /A\	- /	AA
	- 1	/A\

# Part 3 – Reducing risk profile

Case #2 - Rise in Telemedicine

- What compliance risks are introduced?
- What mitigation strategies should compliance be using?
- · Can you suggest any best practices?

# Wrap up

- We quickly ran through the key steps in a robust risk management process
- We defined and explained how environmental scanning can improve how you identify and address risks
- And together we shared our knowledge and experiences regarding a few emerging or evolving risk area

(<u>A</u>)
