## History of ACOs....Started in 2012

### What is an ACO?

ACOs are groups of doctors, hospitals, and other health care providers, who come together voluntarily to give coordinated high-quality care to their Medicare patients.

The goal of coordinated care is to ensure that patients get the right care at the right time, while avoiding unnecessary duplication of services and preventing medical errors.

When an ACO succeeds both in delivering high-quality care and spending health care dollars more wisely, the ACO will share in the savings it achieves for the Medicare program.

### Statutory Basis

Congress enacted the Patient Protection and Affordable Care Act (Pub.L. 111-148) on March 23, 2010. Section 3022 of the Affordable Care Act amended Section 1899 of the Social Security Act (the Act) and established the Shared Savings Program. To learn more, refer to the [Affordable Care Act](#) and [Social Security Act](#).

More recently, the requirements for assignment under the program were amended by the 21st Century Cures Act (December 2016). The 21st Century Cures Act amended the Act to require the Secretary to assign beneficiaries to ACOs participating in the Shared Savings Program based not only on their utilization of primary care services furnished by physicians, but also on their utilization of services furnished by Rural Health Centers (RHCs) and Federally Qualified Health Centers (FQHCs), effective for performance years beginning on or after January 1, 2019. In addition, the Bipartisan Budget Act of 2018 (BBA of 2018) established additional tools and flexibilities for ACOs specifically in the areas of new beneficiary incentives, telehealth services, and choice of beneficiary assignment methodology.
